ECO-FRIENDLY
SUBSTITUTES
FOR PLASTIC

About Us

It all started with a vision: eco-friendly product manufacturer who makes our customers society and environment smile. Premium Eco Friendly Dinnerware, as renewable and biodegradable as a leaf falling from a tree (100% natural). And here we are.

Next time you eat, feel the nature in your hands. Enjoy the summer. And the unbeatable feeling of making the world a greener place.

Premium Eco Friendly Dinnerware

Why are we doing this?

Because we spend only a brief moment on this world, everything we own is only temporary. What really counts is what we create, what we build up. What counts are our actions and our decisions. They last forever. They make up the true value of our being. If these actions lead to building up a sustainable, social, gainful company, then we will have the greatest job in the world.

MANUFACTURING PROCESS

As an Areca leaf product manufacturer, we have set our products to meet international quality standards through optimized manufacturing process with Hygienic conditions, trained and skilled operational personnel and dedicated quality assurance systems.

Our products are manufactured from fallen dry sheaths of Betel nut trees. The areca sheath when dried will fall from the tree and it is collected from the farms fresh and used for making products. These sheaths are available in plenty in the South India region. The usage of these leaves was started from our ancestors. We are only making them into attractive shapes to meet the different customer requirements.

Just as the way you treat other people reflects your personality, the way you treat the environment reflects who you actually are.

A good person will treat the environment responsibly.

So treat the environment well and prove that you indeed have a good personality.

OUR PRODUCTS

- ◆ 5" SQUARE PLATE
- ◆ 6" SQUARE PLATE
- ◆ 7" SQUARE PLATE
